- Live Demo: https://real-estate-using-nextjs.vercel.app/

Selected Projects

□ Loan Management Platform

Next.js · React · TypeScript · MySQL

Developed a comprehensive loan management platform designed to streamline member management, loan applications, approvals, repayments, financial transactions, and staff workflows.

- Implemented loan application and approval workflows.
- Developed member and financial record management.
- Built administrative dashboards and staff-based workflows.
- Implemented authentication and role-based access control.
- Integrated MySQL for structured financial and member data.
- GitHub: https://github.com/emmy-tech247/Loan-management-system-using-Next.js

---

□ Loan Management System

PHP · HTML · JavaScript · MySQL

Built a database-driven loan management system for handling loan applications, member records, approvals, repayments, transactions, and administrative operations.

- Developed loan processing functionality.
- Implemented member management.
- Built repayment and transaction workflows.
- Integrated MySQL database operations.
- Developed administrative functionality.
- GitHub: https://github.com/emmy-tech247/Loan-management-system
- Live Demo: https://dcgcoop.com.ng/

□ High-Converting Landing Page

HTML · CSS · TypeScript · React

Developed a modern landing page focused on clear communication, responsive design, strong calls-to-action, and user engagement.

- Designed conversion-focused layouts.
- Created responsive interfaces.
- Implemented product and service presentation.
- Optimized the user journey toward key actions.
- GitHub: https://github.com/emmy-tech247/typescript-landing-page

---

□ Modern Restaurant Website

React · JavaScript · CSS · Bootstrap

Developed a responsive restaurant website designed to showcase menus, signature dishes, restaurant information, and customer-focused content.

- Created responsive restaurant layouts.

- Developed menu and food showcase sections.
- Implemented mobile-friendly navigation.
- Focused on visual presentation and customer engagement.

□ Modern School Website

React · Next.js · API · MySQL

Developed a professional school website designed to provide students, parents, and visitors with accessible information about academic programs, school activities, and institutional services.

- Built responsive and accessible interfaces.
- Integrated APIs and database-driven content.
- Structured academic and institutional information.
- Created user-friendly navigation and content sections.

□ Custom Business Website

WordPress · Plugins · MySQL

Designed and developed a customized business website around specific business requirements, combining professional presentation with practical functionality.

- Customized WordPress layouts.
- Integrated plugins and required functionality.
- Connected website features with database-driven content.
- Optimized the website for responsive use.

Professional Experience

Freelance Full-Stack Web Developer

Self-Employed | Remote
2024 – Present

- Develop responsive websites and full-stack web applications using React, Next.js, PHP, Laravel, Python, Django, and MySQL.
- Design and implement frontend interfaces focused on usability, responsiveness, and modern user experience.
- Develop backend functionality, APIs, authentication systems, database structures, and business workflows.
- Build customized solutions based on individual client and business requirements.
- Troubleshoot application issues and improve functionality, performance, and maintainability.
- Manage projects independently from requirements gathering through development, testing, and delivery.
- Continuously research and adopt modern development tools, frameworks, and best practices.

Web Development Tutor

ASTUTE, Abuja
2020 – 2024

- Taught students the fundamentals of HTML, CSS, and JavaScript through practical development exercises.
- Guided learners in building responsive websites and understanding programming concepts.
- Introduced students to Git and GitHub for version control and project management.
- Taught basic Python programming and problem-solving techniques.
- Assisted learners in debugging code and developing practical web projects.

Education

Computer Engineering

Ahmadu Bello University, Zaria, Nigeria

Master's Degree / M.Sc. in Computer Engineering
Expected March 2025

Postgraduate Diploma (PGD) in Computer Engineering
February 2015

Core Professional Strengths

- Full-Stack Web Development

- Problem Solving & Analytical Thinking
- API Development & Integration
- Database Design & Management
- Authentication & Authorization
- UI/UX Implementation
- Business Application Development
- Independent Project Delivery

Career Objective

To contribute my full-stack development expertise to a forward-thinking company, technology team, agency, or client where I can build reliable digital products, solve real-world problems, contribute to meaningful projects, and continue growing as a professional software developer.

Open to: Remote · Freelance · Contract · Full-Time Opportunities
